

Managed Service Provider (MSP)

Design & Implementation

We deploy mission-ready technology solutions aligned with DoD standards, ensuring secure integration, interoperability, and high performance across multi-domain environments.

Data Backup / Recovery Advisory Services

We provide strategic guidance and defense-grade data resilience solutions to protect critical information and enable rapid recovery during disruptions, supporting mission continuity.

Vendor Management

We manage vendors end-to-end to maintain accountability, reduce supply-chain risk, and align with DoD procurement standards—maximizing value and strengthening mission support.

Risk & Compliance Assessments

We identify vulnerabilities and ensure compliance with NIST, RMF, and Zero Trust, delivering clear, actionable recommendations that enhance cybersecurity and operational readiness.

Intrusion Detection / Prevention

We implement advanced ID/IP systems that detect, deter, and defeat cyber threats targeting DoD networks, protecting mission-critical assets and maintaining system integrity.

CMMC L2 Certified | RPO-Listed | CCP-Staffed

Silotech Group provides the expertise contractors need to meet DoD CMMC requirements with accuracy and confidence.

CMMC 2.0 | CCP Staffed

Gap Assessments

- Identify CMMC Level 2 gaps
- Receive actionable remediation guidance

POA&M Development

- Prioritized plans with clear closure

Control Implementation

- Hands-on support implementing CMMC controls
- Strengthened cybersecurity posture

Why Silotech Group?

- Proven DoD contractor experience
- CCP-certified professionals
- RPO-listed and fully aligned with CMMC

CMMC Level 2 compliance

Value Added Reseller (VAR)

Silotech partners with leading OEMs—Cisco, HPE, Juniper, NetApp, Microsoft, Salesforce, ServiceNow—to deliver IT, engineering, and professional services across networking, hybrid data center, collaboration, mobility, cybersecurity, and managed services.

We support federal/state agencies, education, financial services, healthcare, and commercial clients with flexible buying models including CapEx, leasing, and as-a-service options.

Our VAR Capabilities

Enterprise Systems Engineering, Design and Integration

Designing scalable, real-time solutions and executing integrations with speed and accuracy.

Enterprise Architecture Design and Implementation

Supporting modernized workflows and cost-effective consolidation initiatives.

Procurement of IT Hardware, Software, and Licenses

Securing optimal pricing, communicating quickly, and managing lifecycle needs so clients stay mission-focused.
